- Japanese Association of Health Directors of Prefectural Governments
- Japanese Association of Public Health Center Directors
- Japanese Association of Chief Public Health Nurses of Public Health Centers
- Japanese Federation of Chief Mental Health and Welfare Centers
- Japanese Association of Public Health Center Registered Dietician

7. Survey and Research Programs on Public Health

I Programs under the subsidy of Ministry of Health, Labor and Welfare

(1) Comprehensive Programs on Community Health

JPHA has established the Comprehensive Community Health Promotion Committee to promote the community health activities through the following programs.

① Comprehensive Research Program on Community Health

In order to promote the comprehensive and effective community health activities, the nationwide objective survey of the needs for community health activities, the test of their validity and the dissemination of their outcomes have been conducted since 1994 under the cooperation with such nationwide organizations as the Japanese Association Health Directors of Prefectural Governments, the Japanese Association of Public Health Center Directors, the Japanese Association of Chief Public Health Nurses of Public Health Centers, the Japanese Federation of Chief Mental Health and Welfare Centers and Japanese Association of Public Health Center Registered Dietician.

② Planning and Training Programs

JPHA plans and implement trainings for the personnel in health, medical services and welfare services. This program includes the assistance training for the municipal health centers, the community health personnel training of the medical system reform, the trainings for public health nurses in the community, and the training for the heads of public health nurses.

③ Provision of Health Information

JPHA provides the comprehensive community health information, for example, the provision of the literatures relating to the community health, and the information dissemination of the unique activities of community health.

(2) Survey and Research on Health Crisis Management System

For the health crisis management system, JPHA invites the foreign researchers, dispatches Japanese researchers to the foreign countries, fosters younger researchers (Research Residents), disseminates the results of the researches and activates the utilization of the results.

II Programs entrusted by Prefectures and Cities

(1) Aid to the atomic bombed victims living abroad for their health promotion and medical care (entrusted by the governments of Hiroshima Prefecture and Nagasaki Prefecture).

(2) Aid to dispatch the specialists (IHEAT: Infectious Disease Health Emergency Assistance Team) of Public Health to the local government and give training them as part of COVID-19 measures.

8. Management of “Ko-Shu-Eisei Building”

JPHA operates the management and maintenance of the “Ko-Shu-Eisei Building.”
